

## PZ.2165 Fire-station

A playground set imitating a fire station, with a slide, stairs, and a roofed house. The load-bearing elements of the set, such as poles, are made of powder-coated galvanized steel.

Panels made of HDPE plates resistant to weather conditions.

#### **Technical data:**

- length: 477 cm
- width: 164 cm
- height: 200 cm
- required area: 827 x 464 cm
- compliance with standards: PN-EN 1176-1; PN-EN 1176-3

#### **Materials:**

- metal elements made of steel triple protected against corrosion by hot-dip galvanizing, chromating and powder painting with a polyester coating, ensuring high resistance to weather conditions and discoloration in UV rays,
- finishing elements (panels) made of HDPE plates resistant to discoloration in UV rays,
- slide made of stainless steel, with sides made of HDPE plates resistant to discoloration in UV rays,

#### **Safety:**

- galvanized steel, chromated and powder coated with a polyester coating,
- stainless steel screws.
