

## PLAY SYSTEMS

### HULA HOP DANCER– SAK.6014

A swing device designed for two people for public playgrounds. The device consists of a seat, two handles and two springs.

The seat is created in a modern rotomolding technology from LLDPE material. As a result, it's resistant to weather conditions and UV radiation.

Safety is ensured by fixing rubber bumpers made of EPDM material around the circumference of the seat. Available colors: yellow, blue, red, green.

## PLAY SYSTEMS

### **Technical data:**

- diameter: 112 cm
- height: 100 cm
- Fall zone: ø412 cm
- safety standard: EN-1176-1:2017; EN-1176-6:2017

### **Materials:**

- LLDPE colored in mass,
- Side surface, absorbing impacts, made of EPDM colored in mass,
- Powder-coated steel springs,
- Connecting elements, ie screws, etc. made of stainless steel,  
Chains made of stainless steel.
